## What is Bright Light Therapy?

Bright Light Therapy uses safe, intense doses of light to treat conditions that can occur due to light deficiency. Light acts like an essential nutrient and daily exposure can have a major impact on your well-being.

Many people simply don't get enough light and this deficiency can lead to the Winter Blues or other issues. Clinically tested Bright Light Therapy systems have been shown to be an effective, non-invasive treatment option for many suffering from the effects of light deprivation.

## Who can benefit?

Up to 44 million North Americans suffer from the Winter Blues. Bright Light Therapy is the **#1 Recommended Treatment!**

Clinical studies have also shown Bright Light Therapy may help with:

- Sleeping Patterns
- Jet Lag
- Shift Work Adjustment
- Low Energy

## What are the benefits?

- Increased energy
- More positive moods
- Improved sleeping patterns

 Treatment time only  
**20 - 30 minutes each day.**

“*Sometimes I feel like a warmth and calm comes over me when I use the light... It's just such an easy, painless, safe remedy for a serious problem.*”

**—Paula Neal, Burlington, ON**

## What is BrightZone™ technology?

BrightZone™ technology means Day-Lights are engineered and tested to provide both the appropriate field of illumination and the 10,000 LUX experts recommend for maximum therapeutic benefit.

Comes with built-in stand, and carry-handle.  
Adjustable legs control the height and angle of the light.

## Why Day-Light Classic?

- Clinically tested
- Meets stringent Bright Light Therapy standards
- Trusted by leading researchers
- Features BrightZone™ technology
